

# SOURCINGPAD

-Understand First. Act Strategically.

Before improving your supply chain, we need to understand it. PEFA Sourcingpad is the first step in our sourcing process, where we learn about your current supply setup, technical requirements, cost structure, and delivery needs.

This allows us to determine whether we can help you identify better alternatives — with improved quality, pricing, or lead time — and how we might approach it.

## 1 PRODUCT & SUPPLY UNDERSTANDING

## 2 SPECIFICATION & REQUIREMENTS

## 3 SOURCING FEASIBILITY EVALUATION

### KNOWLEDGE TRANSFER

We receive an introduction to your products, components, or services — including pricing, volumes, and technical specifications.

### SUPPLY CHAIN ANALYSIS

We review current sourcing structures, delivery performance, and risk areas to understand your baseline.

### FEASIBILITY CHECK

We assess if PEFA has the network, capacity, and know-how to provide valuable sourcing alternatives — and define the next steps.
